

SPECIAL SESSION

REDISTRICTING / INITIATIVE PETITION

What is Happening?

Jefferson City politicians, backed by Washington, D.C. operatives and lobbyists, are holding a special session to rig the system in their favor.

They are pushing two proposals:

- Gut Missourians' century-old right to pass laws through the initiative petition process and stop laws passed by the Missouri Legislature that go too far.
- Redraw congressional districts mid-decade, a blatant partisan power grab to shield politicians from accountability.

Why This Matters:

If they win, our votes will count for less, our schools will suffer, and our communities will be ignored. For over a century, Missourians have used the initiative petition to hold politicians accountable. It has protected school funding, raised wages, and given communities a voice.

Now the goal is to silence citizens so special interests can privatize schools and weaken unions. Redistricting is another rigged deal that lets politicians choose their voters instead of voters choosing them.

What to Say When Talking with...

Public:

Missourians should make our own decisions, not lobbyist and Washington politicians.

For over 100 years, we've had the right to vote directly on laws.

Now they want to rip that right out of the constitution, weakening our votes while giving lobbyists more power.

We need to stand up for Missouri rights and make sure every vote counts.

Educators:

Educators have always fought to make sure students get the resources they deserve.

Now Jeff City politicians want to silence us by gutting the initiative petition process. All to force through vouchers without voter pushback.

This is about our freedom to stand up for students and schools. We cannot let them take our voice.

Parents:

Every child deserves a strong local school and parents deserve a real voice in decisions that shape their future.

But politicians in Jefferson City want to rig the rules and shut communities out. It's a power grab that silences parents and lets outsiders slash funding and damage your child's future.
